

Curriculum Vitae of Jaakko Vuolasto

Mobile phone: +358 40 3040317. Email: jaakko.vuolasto@gmail.com

ORCID: <https://orcid.org/0000-0003-3639-0314>

My professional journey lies at the intersection of people and information technology, where I build bridges between users, developers, and other stakeholders. Currently, I am a university teacher at University of Jyväskylä in Finland, in the Technology Management degree program. With over 20 years of experience in the software industry and consulting services, I have contributed to diverse fields such as forestry, healthcare, digital banking, and language technology. My strengths include effective communication, networking skills, and the ability to understand and navigate multiple and even conflicting perspectives. I believe in making the difference by keeping the promises I have made, and my goal is to work well with other people.

1 Personal details and the date of the CV

Surname, given names: Vuolasto, Jaakko Oskari

Date of the CV: June 25, 2025

2 Degrees

2024: *Doctor of Science (Technology)*, Engineering Science, with Software engineering as the research field. Lappeenranta-Lahti University of Technology LUT, Finland.

2001: *Master of Science*. Major in computer science, minor in mathematics and philosophy. University of Helsinki, Finland.

3 Other education and expertise

2017: Basic studies in Pedagogy 25 cr. Open University of the University of Jyväskylä.

2014: Certified Scrum Product Owner. Agile42, Finland.

2013: Certified Scrum Master. Reaktor, Finland.

2007: Goal-oriented sales coaching. Urano Oy, Finland.

2006: Product manager for technology products. IIR Finland Oy.

4 Language skills

Native: Finnish. Fluent in English, intermediate in Swedish, beginner in Russian and Italian.

5 Current employment

Jan 2025 – Present: University Teacher at University of Jyväskylä, Faculty of Information Technology. I teach in the Technology Management degree program.

6 Previous work experience

Oct 2020 – Dec 2024: *Junior Researcher at LUT University, Department of Software Engineering*. I complemented my business career with academic research as a full-time doctoral student. My doctoral thesis was titled *Actors, information systems, and their relationships as drivers of B2B platform development*. It focused on the various interactions of the social and technological elements in the development of a B2B platform.

Aug 2012 – Sep 2021: Key Account Manager at Trimble Forestry Europe. I worked as a product owner, service manager, and team leader for WoodForce, a digital platform for forestry operations. During this time WoodForce became the business-critical information infrastructure for the wood supply in Finland. My responsibilities included steering the development of the service, ensuring its operation, leading the development team, and working with all the stakeholders: customers from different sectors of the forest industry, partners such as forest machine manufacturers, educational institutions, and IT service providers. In addition, I managed projects & clients in the insurance, energy, and home care sectors during my service at Trimble. I was on study leave from Oct 2020 to Sep 2021.

Dec 2009 – Aug 2012: Director, Solutions at Medi-IT Oy. I started and managed a new unit, which provided consulting services to cities and hospital districts. My responsibilities included developing and implementing a strategy for the unit and seeking openings for new cooperation between the health care organizations and IT solution providers. I led contract negotiations for the joint ICT development of eleven hospital districts.

Aug 2008 – Aug 2012: Development Manager at Medi-IT Oy. My primary responsibility was the regional deployment of electronic prescriptions in South-Eastern Finland. This included the creation of a large-scale information infrastructure and coordinating the work of software and hardware providers, end-users, and other stakeholders. Additionally, I managed smaller health care IT projects.

My complete work experience is available at <https://www.linkedin.com/in/jaakkovuolasto/>.

7 Research funding and grants

SafeRecords: Jan 01, 2023 – Oct 31, 2024. Research to Business funding from Business Finland, for GDPR compliant certificates verification based on blockchain technology. Project budget was 404 000 eur, of which 70% is funded by Business Finland. The principal investigator was Professor A.K.M. Najmul Islam. During the application process my contribution was industry experience and multi-sided markets. I was the project manager.

9 Research supervision and leadership experience

My leadership experience is from my positions in the industry, when I was working as Director, Solutions at Medi-IT Oy (2009-2012) and Team Leader at Trimble Forestry Europe (2019-2020). During my career in the industry, I was the company advisor for two Master's theses.

10 Awards and honours

2023: The Runner-up Paper Award of the 14th International Conference on Software Business (Lahti, Finland). **Vuolasto, J.** Who Does What? Evolving Division of Responsibilities in a B2B Platform.

11 Scientific and societal impact

Member of the board at HL7 Finland, promoting interoperability standards in healthcare information systems, from Jan 2011 to Aug 2012.
